

FOLEY REVITALIZATION AND BEAUTIFICATION ADVISORY BOARD

CENTURY TREE PROGRAM

The Mayor and City Council of Foley have passed a resolution establishing the Foley Century Tree Program to raise awareness of and to preserve the many old trees in our beautiful City. One of the aims of this program is to recognize private property owners, within the Foley City limits and its Police Jurisdiction, who protect and preserve their old trees that meet the criteria to be designated a Century Tree.

FOLEY CENTURY TREE CRITERIA

A tree must be determined to be 100 years old and in reasonably good condition (i.e., expected to live at least 10 years) to be designated a Century Tree. This age will be deemed to be achieved for any oak tree that is at least 30 inches in diameter at 4.5 feet above the ground, and for any other species that is at least 35 inches in diameter at 4.5 feet above the ground. Factors in addition to size that will be considered in determining whether the age criterion has been met are dated photographs or written statements.

The Foley Revitalization and Beautification Advisory Board will examine and measure each tree nominated, and will decide if all criteria are met. The City will record the pertinent information and will provide one (1) plaque per species, identifying and recognizing the tree, to the private property owner. If it is determined that the property owner has more than one (1) Century Tree per species, he may purchase additional plaques from the City. The property owner will be required to continue to display the plaque, which is furnished by the City.
